# Tailift Z Series

of forklift trucks are designed to boost performance and to increase productivity

#### Internal hidden tilt cylinder

Internal tilt cylinder avoids and reduces scrape possibility.

#### Tailift automatic transmission

Fast start with quick response. Smooth electronic gear shifting.

#### Small steering wheel

The new 300mm steering wheel is easier to operate and it reduces the workload on the operator's arm and shoulders.

#### Hydraulic control levers

Positioned ergonomically to reduce driver's fatigue

#### Horizontal brakes system

Reduce pedal resistance with extended brake pedal arm

#### Easy maintenance

- Heat resistant, non slip and scratch resistant. Structure can withstand 450kg of weight.
- Our latest hood is able to enlarged up to 80 degrees to make space for servicing.
- Compact fuse box for easy and quick inspection.
- Easy to change air filter.

#### Long operator assist grip

To ensure safety and comfort for operator while reversing.

#### Spacious operation space

The new Z series is 30% wider than 7 series giving the operator more comfort to get in and out of the vehicle.

#### High performance low fuel consumption engines

The new Z series uses engine that give high performance and low fuel consumption.

#### Comfortable seat

Ergonomically designed with adjustable backrest and document bag.

#### Integral heavy duty chassis

The strong no-bolt integral heavy duty chassis gives the driver 20% more protection from falling loads, suited for all kinds of working surfaces.

#### Multi-functional LCD panel

A large and easy to read multifunctional LCD panel provides operators maintenance information clearly.

#### New rear axle

The new axle provides a smaller turning radius and wider steering angle of 85 degrees.

#### F/R control lever

Integral forward/reverse & direction lever offers easy shifting between forward and reverse.
